LED's **STAR NITE LF SERIES™** is the latest innovation in Star Ceilings that is so realistic, you feel as if you can reach up and catch a star. Each panel has its own self contained LED driver on the back of the panel, and with the use of our plug and play harness, you can run over 60 panels on a single 123V Class II 60V AC transformer. This system averages less than 1/10th the power consumption of a single miniature incandescent system, which means years of maintenance-free installations. No expensive illuminators are required, and our LFC-Controller can be mounted in a single gang box or a table top model and can run over 200 panels per controller.

The **STAR NIGHT LF SERIES™** consists of 24"x 24"x 0.75" (610mm x 610mm x 19) Frost Clima Plus Ceiling Panels by USG. Each panel has 12-24 fibers in 3 diameters operating from a 3-LED driver on the back of the panel. A custom harness is provided to plug into each driver!

FEATURES:

- Cast Panels are not painted, color permeates entire panel
- Low Power Consumption: less than 0.75 watts per panel
- All on, Twinkle and Fade options
- Plug and Play Harness
- Realistic multi-size points of light
- Each panel has its own led driver -no huge expensive illuminators
- No Fibers running back to remote illuminators
- Multi-colors available
- LED harness/driver system available for other applications

APPLICATIONS:

- **Architectural Accents**
- **Bars / Clubs**
- **Restaurants**
- **Auditoriums**
- **Home Theater**
